

InvestMap™

It's your future.
KNOW you've
got a solid strategy.

Your retirement savings will be a big part of your life one day – ultimately providing you with financial support for many years following your career. Make sure you stay on course toward the future you envision.

Plan smart.
Invest for the long haul.

Investing for your future involves complex and sometimes emotional decisions. InvestMap is an approach for your retirement plan that provides you with a lifelong strategy and keeps you invested and diversified through market ups and downs. Best of all, you can take advantage of InvestMap without incurring any additional fees.

Start smart. It's easy. InvestMap creates a portfolio for you – made up of existing funds within the plan. Your InvestMap portfolio is an age-based, diversified asset allocation strategy developed by independent investment professionals. If you elect InvestMap, your entire retirement plan account balance and all future contributions will be invested into the InvestMap strategy. Because it automatically becomes more conservative over time, InvestMap may be the only portfolio you'll ever need.*

*InvestMap™ is an investment strategy and should be used with consideration of your other investments and overall investment objectives. InvestMap is not investment advice and is not monitored with your personal investment goals in mind.

Be smart.

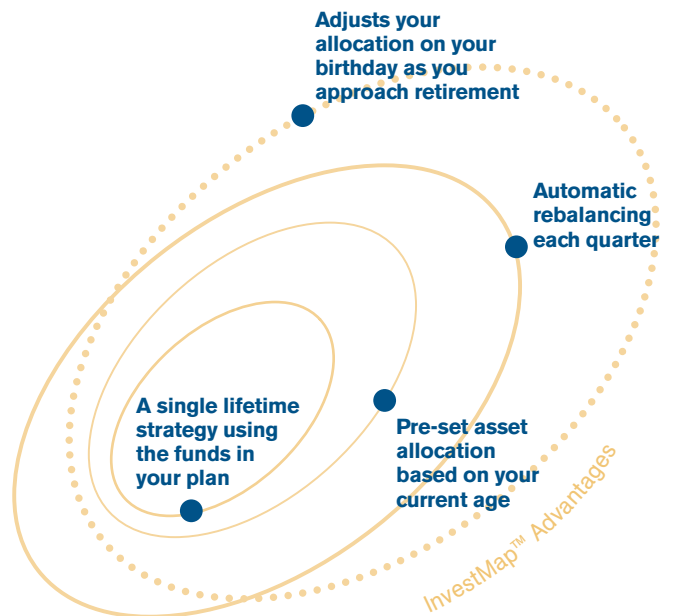

A lifelong, personalized strategy for your retirement.

Invest smart. It's personal. InvestMap uses your current age along with your complete life span to chart a long-term course for your future. Moreover, since not all retirement investors are the same, InvestMap lets you personalize your election to be more conservative or more aggressive.

Stay smart. It's automatic. Your InvestMap portfolio is automatically rebalanced every quarter and reallocated along the glide path each year following your birthday. Over time, your portfolio gradually grows more conservative, so you take on less and less investment risk. At younger ages, these adjustments will be slight, but they'll become greater as your age increases.

InvestMap is not a single investment; it is a lifetime investment strategy using the plan's underlying investment options. InvestMap's allocation becomes more conservative over time and stops changing at age 75. InvestMap's age-based glide path is developed using industry-standard asset allocation strategies and may change from time to time to reflect long-term market trends or changes to the plan's underlying investment lineup. InvestMap is not investment advice and should not be relied upon as advice. Like any investment, InvestMap can lose money over time. There is no guarantee of the value of your account upon withdrawal or that InvestMap will succeed in its objectives or provide adequate retirement income. For your long-term retirement security, give careful consideration to the importance of a well balanced and diversified investment portfolio, taking into account all your assets, income and investments.
