

2010

Dear TCPT Welfare Fund Participant:

TCPT wants you and all of your fellow plan members to enjoy the best health possible. A big part of staying healthy is making the right lifestyle choices. That is why we are pleased to announce or remind you of the smoking cessation benefits now available to you through the TCPT Welfare Fund. We are also rolling out the Beat the Pack program. This is an optional, self-service, educational, stop-smoking program. It will give you the tools and support that will help you quit smoking. We are excited to bring you this new program. We look forward to your participation in it.

We know how hard quitting smoking can be. That is why we chose to offer the Beat the Pack program to all our members. It gives you stop-smoking information and we hope that the program helps make it easier for you to quit smoking cigarettes.

In addition to the “Beat the Pack Program” we also have specific tobacco cessation benefits and participate in the “Quitlogix Program through Medica.

This program is for the member and spouse only. Program Benefits include: Telephone Counseling, a Personalized Quit Plan, an Online Plan, and Nicotine Replacement Therapy. Outside the specific benefits of the Medica Program, the TCPT Welfare Plan will allow for a three (3) months supply of tobacco cessation prescription drugs paid at 80% under the current pharmacy benefits and two (2) medical office visits with the primary diagnosis of tobacco use. This benefit is available once every 12 rolling months and the lifetime maximum is limited to three attempts. Please contact the TCPT Fund Office to enroll in the Quitlogix Program.

Sincerely,
Twin City Pipe Trades Welfare Fund
